

The Power of Renewable Energy

Renewable energy is energy derived from natural resources that are replenished constantly, such as sunlight, wind, and water.

Types of Renewable Energy

1.Solar Energy: Harnessing the power of the sun.

2.Wind Energy: Using wind turbines to generate electricity.

3.Hydro Energy: Capturing energy from moving water.

4.Geothermal Energy: Utilizing heat from within the Earth.

5.Biomass Energy: Converting organic material into energy.

Why Choose Renewable Energy?
